Amid increasing calls for improved work efficiency and a more flexible working style, ideas of LC analysis are changing. The time has come for an HPLC that delivers rugged, reliable results with less frequent interaction by the analysis methods and aims. In addition, we provide models both with oven cooling functions (C model) and without. LC-2050 UV LC-2050C √ UV LC-2050C 3D √ PDA LC-2050C LT √ - This is our 70 MPa UHPLC model. The method transfer system provides excellent support for running UHPLC and HPLC methods on one device. LC-2060 √ UV LC-2060 3D VPDA * MT : Method transfer system Learn more The new, integrated i-Series LC system keeps the excellent performance of its predecessor but also addresses the demands of an increasingly varied range of users, locations, and approaches to analysis while always delivering highly reliable analytical results. i Series PDA LC-2060C 3D MT* - A more flexible work day Shimadzu Nexera X2 Complete Separation of Co-eluted Peaks by i-PDeA Learn More {"title":"Downloads", "description":"Downloads", "link url":"", "pdf links":[]} {"title":"Applications","source":"product","key":4554,"max":"3","filter_types":["applications","application_note","link_url":"\an\products\liquid-chromatography\/hplcuhplc\/i-series\applications.html","config_list":[{"document_id":13271,"config_id":251}],"page_links":[],"column_title":"Documents"} {"title":"Technical Documents", "source":"product", "key":4554, "max":"3", "filter_types":["technical", "column_title":"Documents"} {"title":"Manuals", "source": "product", "key": 4554, "max": "3", "filter types": ["manuals"], "link title": "Learn more", "link url": "Van/products/liquid-chromatography/hplcuhplc/i-series/applications.html#tbaleAnchor manual", "config list": [], "page links": [], "column title": "Documents"} The Nexera VC Prep is a new preparative supercritical fluid chromatography (SFC) system that offers both the high basic performance developed for the previous Nexera UC model and original state-of-the-art preparative tasks, reducing labor and improving efficiency while fitting into pre-existing workflows. New Anion Suppressor Ion Chromatograph The HIC-ESP is a new anion suppressor ion chromatograph with built-in electrodialytic suppressor, boasting the same low carryover and excellent injection precision characteristic of Shimadzu HPLCs to bring you highly-reliable results. The newly developed anion suppressor prevents peak spreading and achieves high sensitivity, providing stable functionality even over long periods of use. Multiple Analytical Techniques For Carotenoid Analysis In Capsicum Cultivars Carotenoids based on a C40 tetraterpenoid skeleton and play a vital role in plants and animals, but, due to their high variability in the chemical structures, isomerization, poor stability and lack of commercially available standards, their identication in real samples is a challenging task.

New Method Development System LabSolutions[™] MD improves method development efficiency by taking an Analytical Quality by Design (AQbD) approach. This software efficiently develops highly reliable analysis methods by configuring mobile phases, columns, and other parameters using an analysis function that automatically generates analysis schedules with the experimental design method and a data analysis function that plots a design space and predicted chromatogram. An Improvement in Preparative SFC System as a "Solid Autosampler" Preparative SFC is a groundbreaking separation and purification technology. It has a number of advantages in comparison to preparative LC including simplified posttreatment, shorter analysis times, and different separation selectivity. With preparative SFC, the injection of large sample volumes is often required in order to increase the recovered amount.
